

# Mia Chen

## EXPERIENCE

**DH Anticounterfeit AB** | Halmstad 11/2023 – Current  
**Software Developer-Internship**

- Spearheaded the frontend development of an Outlook Add-in project, utilizing React and TypeScript. Integrated seamlessly with existing backend REST API. Implemented Microsoft SOAP API to efficiently process and forward emails. Additionally, contributed to implementing and managing the deployment of the project on AWS, further enhancing experience in cloud-based environments and infrastructure management.
- Worked closely with my teammates who were responsible for the development of the AI models used to extract information from email content. Angular was used for frontend development, while AWS was used to send notifications and C# for backend development and to store data in MongoDB.

**Scanspark Group AB** 09/2014 – 08/2022  
**Purchaser** | Helsingborg

- Oversaw digital purchase records and associated costs.
- Prepared reports to track inventory trends.
- Managed purchase orders and invoices

## EDUCATION

**EC Utbildning** 08/2022 – 06/2024  
**Webbutvecklare Inom .NET**

- Utilized a diverse set of technologies throughout my academic journey, such as C#, ASP.NET Core, SQL Server, Blazor, MySQL, JavaScript, HTML, CSS, Bootstrap, React, Angular, Express, GraphQL, Microsoft SOAP API, REST API, GitHub, Git Desktop, Powershell. Proficient in Agile methodology, Scrum and project management with Jira.
- A React project created to display my [portfolio](#).
- Created a holiday rental [website](#) using React.
- Created a small [Quiz Game](#). Backend is using Asp.Net Core Web API. Frontend is using Angular.
- Developed website for cocktail recipes: [Cocktail Recipe](#)
- Contributed to a Blazor WebAssembly project using C#, XUnit, and GitHub Actions to develop an online website with simulated API data. Played a vital role in agile project planning, including daily meetings, work breakdown, and time estimations. Demonstrated commitment to code quality through enhanced test coverage, regular code reviews, and assisting team members with onboarding. Project deployed on Netlify: [Blazor Online Shop](#).
- Developed a basic shopping website using ASP.Net Core MVC and Entity Framework Core, accessible on GitHub: [Shopping Website](#).

**Linneuniversitetet** 08/2009 – 06/2012  
**International Marketing**
